MODULAR HOUSING FOR ELECTRICAL INSTRUMENT AND
MOUNTING MEMBER THEREFOR
ABSTRACT

~~The invention provides, in one aspect, a~~ A modular housing (16) for enclosing an electrical meter or metering type instrument. ~~The housing~~ is adapted for housing one of a plurality of modular type electrical meter or metering instruments, including instruments with or without a readable display. The housing ~~comprises~~ includes at least one open end for receiving an instrument or instrument components and an interchangeable closure member ~~(26)~~ for closing the open end. The closure member has a first connection means for inter-engagement with the open end of the housing and second connection means for mounting the instrument to a surface such as a wall or a connector rail, preferably a DIN rail. The housing may be used for surface, panel and rail mounted instruments of the same type.
